

CHESS IS A SCHOOL OF LIFE

Chess promotes the mind, because all moves are the result of one's own efforts. Winning or losing is no matter of luck, only of strategy. Chess is a school of thought and makes a valuable contribution to the development of our children. It has many positive influences on the mental, social, emotional and school development of the children, which is proven by numerous studies. In chess, the children practice in a playful way how to deal constructively with challenges in life.

Your child benefits from proven competence gains:

- increase in concentration
- Intellectual advancement
- Strengthening self-confidence
- Personal growth
- Dealing with success & defeat

Chess is a brain testing stone!
